Michael Durkin
 Managing Director
 GTA

Joining Stantec will enable us to better serve our clients, providing us access to the deeper and broader capabilities of a truly global firm. Stantec shares our commitment to strong growth, offers access to specialists across the globe, and aligns with our vision to make a tangible difference in our communities. Both Stantec and GTA strive to create a better world and contribute to the way communities are planned, making them highly connected, livable, progressive, and sustainable.

Jose Granado
 Country Leader, Australia
 Stantec

I am both excited and delighted to welcome everyone at GTA to Stantec. I am pleased they have chosen to join us, and I truly believe we are going to do great things together, including seeking new opportunities for our people and providing a greater breadth of service to our clients.

Our shared similar values, client service focus, and ‘can-do’ attitude differentiates us in the markets and communities we serve. I look forward to welcoming our new employees and looking after our clients and communities. Onwards and upwards!

SYDNEY CENTRAL BUSINESS DISTRICT (CBD) LIGHT RAIL

LOCATION:

Sydney, New South Wales (NSW)

CLIENT:

Transport for NSW

SERVICES:

- Transport Advisory, Planning and Analytics

The CBD and South East Light Rail is a key component in the development of an integrated transport system that will enable the city of Sydney to continue running efficiently. The 7.5-mile (12-kilometre) light rail corridor with 19 stops services major transport hubs, providing easy interchange with buses, trains, ferries, and the Inner West Light Rail. GTA was involved throughout the project's duration, delivering numerous transport modeling tasks to ensure the smooth operation of the light rail and improvements to CBD traffic flows.

OLLI SHUTTLE

LOCATION:

Adelaide, Australia

CLIENT:

Local Motors

SERVICES:

- Transport Advisory, Planning and Analytics
- Transport Engineering

Olli is a twelve-passenger autonomous shuttle bus that is operating on a six-month trial along Adelaide's foreshore. GTA leveraged experience in other autonomous shuttle trials to provide the pre-opening Road Safety Audit, a review and provision of advice for the traffic management plan, and the commissioning stage transport safety assessment to confirm whether the identified risks had been appropriately addressed.

HERSTON QUARTER REDEVELOPMENT PROJECT

LOCATION:

Brisbane, Australia

CLIENT:

Queensland Department of Health

SERVICES:

- Transport Advisory, Planning and Analytics
- Transport Engineering

As the Specialist Traffic and Transport Advisors for the Herston Quarter Redevelopment Project, GTA is working with Stantec to create a landmark Brisbane destination which establishes a global benchmark for health precincts. The Herston Quarter Priority Development Area covers 12.3 acres (5 hectares), including the Royal Brisbane and Women's Hospital.

CHADSTONE SHOPPING CENTRE

LOCATION:

Melbourne, Australia

CLIENT:

Vicinity Centres

SERVICES:

- Transport Advisory, Planning and Analytics
- Transport Engineering
- Technical Design

The largest shopping complex in the Southern Hemisphere is being strategically developed to expand core retail and entertainment facilities and leverage the site as a mixed-use activity precinct. GTA is providing multi-disciplinary transport planning and engineering to support its ongoing development.

NORTH EAST LINK

LOCATION:

Melbourne, Australia

CLIENT:

Victorian Government

SERVICES:

- Transport Advisory, Planning and Analytics
- Transport Engineering

North East Link is the largest transport project in Victoria's history. The 16.1-mile (26-kilometre) motorway scheme in Melbourne connects the Metropolitan Ring Road to the Eastern Freeway. Once complete, up to 135,000 vehicles will use it every day, reducing congestion in the northeast while maintaining local roads for local trips.

CYCLING AND WALKING NETWORK PLAN

LOCATION:

Perth, Australia

CLIENT:

City of Cockburn

SERVICES:

- Transport Advisory, Planning and Analytics

The City of Cockburn's Five-Year Walking and Cycling Network Plan identified new priorities and incorporated contemporary best practices for the design and implementation of future bicycle infrastructure and pedestrian networks.
